

International PhD Forum

Research within the Design Society community offers many possibilities for exchange and collaboration between fellow researchers. While these opportunities cover a broad scope, from young researchers to senior community members with a range of research interests, we aim to support the specific needs of PhD students.

PhD Forum

on 10th and 11th January 2023

Aims:

- To foster the exchange of ideas and research approaches between PhD Students
- To provide opportunities for discussing personal research topics, methodologies, and potential problems with experts
- To enhance networking and collaboration

Format

The forum will allow PhD students to discuss their research questions and ideas with their peers and experienced researchers to support their research. Small discussion groups will be organised in which individual research topics are presented to and discussed within the group. Discussion groups will consist of 5 PhD students and 1 expert.

Participating students will be asked to give an elevator pitch introducing their research in a speed-dating round before the main discussion (3-5 min, you can use a printed poster to facilitate your pitch):

- Research topic
 - research objectives/question (s) and relevance considering published research and industrial needs
 - research methodology applied
- Personal questions/problems or issues you want feedback on e.g.
 - Research approach
 - Potential ideas for enhancing the approach

Participants

The PhD Forum is aimed at PhD students. To facilitate meaningful discussion, it is essential that potential participants should already have defined their PhD research topic, undertaken an initial literature study and formulated aims and objectives.

Application

To apply, please send an email before 10. December to kilian.gericke@uni-rostock.de with Subject "ICORD'23 PhD Forum". Attached to your e-mail, please send a short description (max. 2 pages) of your project using the provided template (download from ICORD web page).

The number of participants is limited to 20, so please e-mail as soon as possible if you are interested, as participants will be selected on a first-come-first-served basis. Additionally, the number of participants from a single department may be limited.

Participants will be informed about acceptance and necessary preparations before 20th December.
